Product text	
Color filter + roll protector This add-on for your Ledlenser is both a roll protector and a color filter. It is available in four various filter colors: Red reduces reflections and helps you maintain night vision away from the light beam. Yellow improves your sight in foggy conditions. Green and red are ideal for animal watching. Blue makes tracks more visible. Simply insert the filter on the lamp, turn on and it's ready.

Footnotes

¹Mesaured values in accordance with ANSI FL1 in the respective settings. If no setting is expressly stated, the values for luminous flux (lumens/lm) and lighting range (meters/m) refer to measurements on the brightest setting, and the values for battery life (hours/hrs) refer to measurements on the lowest setting. A boost function (if available) can be used several times, but only for short periods of time. If the light has different energy modes, the „energy saving mode“ is the basis for measurement.

²Calculated value of capacity in watt-hours (Wh). This applies to the delivery state of the battery(-ies) contained in the respective item, or if it is a light with (a) rechargeable battery(-ies), then to the item's rechargeable battery(-ies) when fully charged.
